Corporate Governance
--- Reinforcement of Governance for Sustained Growth ---

Basic Views of Corporate Governance

We believe that strengthening the system of corporate governance in accordance with the purposes of each principle of the "Corporate Governance Code" of the Tokyo Stock Exchange is an important management issue for maximizing corporate value while meeting the expectations of various stakeholders, including shareholders and other investors, as well as customers, business partners, and employees. Therefore, we are working to strengthen corporate governance based on our fundamental policies of ensuring sound management, executing appropriate decision-making and business activities, clarifying accountability, and maintaining thorough compliance.

Overview of Corporate Governance Structure

NTT believes that an auditing system based on Audit & Supervisory Board Members, including outside independent Audit & Supervisory Board Members, is an effective means of supervising management. Accordingly, we have adopted the model of being a company with an Audit & Supervisory Board. In addition, through the election of outside independent Members of the Board, NTT has strengthened the function of appropriately supervising business execution. Furthermore, through its adoption of an executive officer system, NTT intends to clearly separate management-related decision-making and supervisory functions from business execution functions and improve its management flexibility. Additionally, NTT has voluntarily established a "Nomination Committee" and a "Compensation Committee," each of which consists of five directors, including three outside independent Members of the Board, to further increase the objectivity and transparency of decisions relating to appointment and compensation. NTT has determined that governance functions based on an Audit & Supervisory Board are sufficiently effective to achieve this purpose.

Members of our Board

*As of the end of June 2023

Jun Sawada
Chairperson and Executive Director
Akira Shimada
President and Chief Executive Officer
Katsuhiro Kawazoe
Senior Executive Vice President

Outside Audit & Supervisory Board Member
Kaoru Kashima
Outside Audit & Supervisory Board Member

Skill Matrix

(For background information and other details about the Directors and Audit & Supervisory Board Members, please see page 78.)
Board of Directors

The Board of Directors comprises ten directors, including five outside independent Members of the Board (including two women) and five internal directors (including one woman), and accordingly, the ratio of outside independent Members of the Board is 50%. In addition, the introduction of an executive officer system that clearly separates the management decision-making and oversight functions from the business execution function ensures closer supervision of execution and improved business management flexibility. In principle, the ordinary meetings of the Board of Directors are held once per month, and extraordinary meetings are held as needed. The Board of Directors discusses the group management strategies and makes decisions on matters stipulated by laws and regulations and on important matters related to company management and group management. Moreover, through such means as periodic reports from Directors and Executive Officers on the status of business execution, the Board of Directors supervises the business execution of the Directors and Executive Officers.

Each outside independent Member of the Board has extensive experience and a high level of integrity and insight.

We believe that the outside independent Members of the Board will help strengthen the supervisory function for business execution and expect to incorporate the opinion they provide from their wide-ranging managerial perspective.

With the objective of further strengthening the independence, objectivity, and accountability in decisions with respect to appointments and compensation of officers and related matters made by the Board of Directors, the Company has voluntarily established a Nomination Committee and Compensation Committee, each consisting of five directors, of which a majority (three) are outside independent Members of the Board, and preliminary reviews institutions of the Board of Directors, thereby increasing the effectiveness of governance.

Moreover, in recognition of the fact that response to sustainability issues is an important management issue, the Company has voluntarily established a Sustainability Committee. In 2022, the Board of Directors has decided to implement the Sustainability Committee, and the Board of Directors will take appropriate measures against such matters as changes in climate-related matters.

The Board of Directors, with the duty of ensuring that the Company's Business is managed appropriately, will take appropriate measures against such matters as changes in the business field, including the implementation of the Sustainability Committee.

Audit & Supervisory Board

The Audit & Supervisory Board comprises three outside independent directors, three Audit & Supervisory Board Members (including one female member), who have experience and knowledge in a range of fields—as a university professor, and Certified Public Accountant—and two internal Audit & Supervisory Board Members (including one female member) for a total of five members. NTT conducts effective audits by combining the independence of outside Audit & Supervisory Board Members with the superior information collection capabilities of internal Audit & Supervisory Board Members. Among the Audit & Supervisory Board Members of the NTT Group, Advisory Board Yanagi is a certified member of the Securities Analysts Association of Japan, while Auditor Kenzuke Koshiyama has experience developing the Group's financial reports, and Auditor Kaoru Kashima is a certified Public Accountant, all of whom have considerable knowledge in the areas of finance and accounting.

Activities of the Audit & Supervisory Board

For the fiscal year ended March 31, 2023, amid continued significant changes in management such as the restructuring of our global business, the Audit & Supervisory Board continues to conduct effective audit in collaboration with the Internal Audit Department, Accounting Auditors and Group company corporate auditors on both audit matters required by law and on other matters such as the progress of the Medium-Term Management Strategy and initiatives to maintain and improve corporate governance, the status of compliance, and stable provision of telecommunication services on the basis of the audit plan.

Audit & Supervisory Board Members, including outside independent Audit & Supervisory Board Members, attend meetings of the Board of Directors and other important meetings. In addition, Audit & Supervisory Board Members meet with Representative Members of the Board and outside independent Members of the Board to exchange ideas and opinions, as well as hold meetings to exchange ideas and opinions for certain topics with representative Members of the Audit & Supervisory Board. In addition, Audit & Supervisory Board Members of Group companies, including overseas subsidiaries, in order to maintain an understanding of the status of the execution of duties by Directors and Executive Officers, and to provide their opinions as needed.

In the fiscal year ended March 31, 2023, Audit & Supervisory Board Members met to exchange ideas and opinions with Representative Members of the Board, Outside independent Members of the Board and others 40 times about management issues and responses. In fiscal 2022, we held Opinion Exchange Meetings three times and three times with Representative Members of the Board 40 times.

In addition, Audit & Supervisory Board Members continued to contribute to the strengthening of corporate governance systems and the fostering of awareness of compliance matters.

Additional, with regard to coordination with related audit organizations and inspections, we have been handling matters through cooperation and the use of web conferencing systems and site visits to enhance the effectiveness of audits.

Evaluation of the Effectiveness of the Board of Directors

Overview of Evaluation

| Participants | All 10 Directors and 6 Audit & Supervisory Board Members |
| Period | March 2023 |
| Questionnaire Format | Anonymous surveys comprising 37 questions involving 4-level rankings as well as open-ended questions |
| Major Subjects | Roles and responsibilities of Directors and of the Board of Directors itself, composition of the Board of Directors, operation of the Board of Directors, support systems for outside Members of the Board |
| Results Aggregation and Analysis Method | After aggregation to third-party organization and analysis by Board of directors' organization, the results are shared and issues and improvement measures are discussed at Board of Directors' meeting |

Evaluation Results

NTT implements an evaluation of the effectiveness of the Board of Directors annually for the purpose of strengthening the governance of the top management through continuous improvement of effectiveness of the Board of Directors. The FY2022 evaluation results confirmed that the Board of Directors was sufficiently fulfilling its important role and responsibilities, with a majority of positive opinions for all of the questions.

In addition, through feedback sessions implemented to invigorate strategic discussions and to enhance discussions on important issues such as important matters related to corporate and Group management, including restructuring to strengthen our global business, and formulation of policies to further strengthen the role of Directors expressed positive feedback. Therefore, we have evaluated that the effectiveness of the Board of Directors is being assured.
I have been involved in research and development and standardization activities for over 40 years on a computer system responsible for controlling various machines named TRON (The Real-time Operating system Nucleus), and have contributed to the realization of ubiquitous computing and IoT by openly and freely disseminating its achievements worldwide. Based on this experience, I have made suggestions primarily in the field of technology, including research and development, DX promotion, and social implementation of technology, at NTT’s Board of Directors meetings.

The new medium-term management strategy, which has been publicized after discussions that also involved Outside Members of the Board, is well-balanced, incorporating growth areas like IOWN, AI, and robotics, as well as the public sectors unique to NTT, which supports the communications infrastructure that is the foundation of society. With regard to AI, I have recommended that the NTT Group comprehensively consider both the risks involved in using generative AI in operations and the risks that may affect the Group’s performance and services if the utilization of generative AI does not progress. From the perspective of Japan’s national security, I believe it is important to promote and strengthen the domestic development infrastructure for AI, and I think NTT is best suited to be the leading entity in this regard.

On the Nomination Committee and Compensation Committee, I have been supervising strategy formulation and execution by the management team by giving suggestions regarding the appointment of officers, resource planning, and remuneration systems, while also conducting appropriate evaluations. Going forward, by offering advice and oversight from a neutral position as an outside independent Member of the Board, I aim to contribute to NTT Group’s sustainable growth as it takes on the challenge of new technologies like IOWN and continues to create value.

Due to advancements in technology, business models are undergoing rapid changes. To thrive in such an environment, it is insufficient to run a company solely with individuals who share the same values. Rather, it is essential to incorporate fresh perspectives and value systems through the promotion of diversity, thereby driving innovation forward. I became the first female Board Member at IBM Japan. While there, I established the NPO Japan Women’s Innovative Network and have worked hard to promote diversity management at companies.

Within NTT’s Board of Directors, I contribute to informed decision-making by offering insights and recommendations that cover not just a human resources strategy inclusive of diversity, but also global business development with a conscious regard for our relationships and positioning vis-a-vis competitors worldwide, as well as assured responses to risks associated with global governance.

Given that Japan stands at 125th out of 146 countries in the World Economic Forums’ (WEF) “Gender Gap Index” for 2023, it appears that many Japanese companies have yet to fully grasp the core essence of promoting diversity. Given the context, I commend the various initiatives that the NTT Group has undertaken, including the promotion of active roles for women, foreign nationals, and external talent, as well as the implementation of a remote work standard system to enhance flexibility in living location. For fiscal 2022, the percentage of women newly promoted to management positions narrowly missed the 30% target. I sincerely hope that this goal will be achieved in fiscal 2023.

As an outside Member of the Board, it is equally crucial for me to support the company in taking calculated risks. Going forward, I will leverage my past experience and continue to contribute to the proper business operations of the NTT Group and medium- to long-term corporate value enhancement through vigilant oversight of decision-making and business execution from an independent, objective standpoint.

After joining Sony as an engine in subsequently leading the company as a manager, I took the helm of a national research institute as the Chairman of the National Institute of Advanced Industrial Science and Technology. Drawing on this experience, I have been conducting management oversight at NTT through Board of Directors and exchanges with the representative directors, offering opinions on research and development and competition policies, as well as giving advice on timely and appropriate responses during major telecommunication failures and monitoring executive performance, all with the goal of achieving sustainable growth.

NTT Group is engaged in a wide range of research and development activities, from basic research to practical applications. IOWN, which is also the title of our new medium-term management strategy, is a groundbreaking next-generation network that is not only eco-friendly, but also crucial for strengthening Japan’s industrial competitiveness. I appreciate the direction given for continued investment to accelerate the manufacturing and practical application of photonics-electronics convergence devices as part of the IOWN initiative under the slogan from concept to implementation.

I also commend the bold 1:25 stock split announced concurrently with the new medium-term management strategy as a progressive initiative. This reduces the investment per unit and makes it easier for people across various age groups to purchase shares. I look forward to NTT leading changes in the Japanese stock market. I plan to continue to encourage the realization of medium-term management strategies by leveraging my experience in corporate management to make proactive suggestions and monitor management from a medium- to long-term perspective.

Drawing on my experience in corporate management at Dai-ichi Life Insurance and as the Chairman of the Central Council for Education under the Ministry of Education, Culture, Sports, Science and Technology, I have been making suggestions to management while actively participating in decision-making as needed, particularly with regard to the effects of investments and the risks of new funding projects, confirming the appropriateness of capital policies, and strengthening human capital, all in an effort to strengthen the competitiveness of the NTT Group.

The prolonged COVID-19 crisis and Russia’s invasion of Ukraine have highlighted various issues in Japan, such as food and energy self-sufficiency problems and the slow social implementation of DX. To cope with these changes to the social structure, human resources are undergoing significant changes, and human resource development is becoming ever more important. Given the circumstances, I think it is very commendable that NTT has clearly stated in its new medium-term management strategy its commitment to enhancing support for autonomous career development and expanding investment to support business growth.

As an outside Member of the Board of NTT, I had meetings with institutional investors and discussed the current understanding of IOWN, the aim of the newly launched growth strategy focusing on EBITDA, and initiatives aimed at improving employee engagement scores, among other things. I will continue to contribute to the sustainable growth and improvement of corporate value of the NTT Group through proactive suggestions based on my independence as an outside Member of the Board and experience in corporate management, always keeping in mind the voices of shareholders and investors at Board of Directors meetings and other forums.

After contributing to economic journals in the electronics and IT sectors, as well as engaging in research activities at the University of Tokyo, I am now focusing on research projects about energy policy and economic security at Keio University. Energy and environmental policies are not merely important national issues that influence the macroeconomy through fuel resource trading; they also significantly impact industrial and corporate competitiveness, further reverberating back to the macroeconomy.

The NTT Group has publicly announced its new medium-term management strategy, “NTT Green Innovation Toward 2040,” its aim to achieve carbon neutrality by the year 2040. This goal includes efforts for Scope 1 and 2 emissions, with the intention of expanding into Scope 3. To promote the use of renewable energy, the NTT Group is proactively investing in companies specializing in renewable energy development. In the Board of Directors meetings, I thoroughly scrutinize each investment opportunity’s scale, the appropriateness of the investment amount, and the associated risks before offering my endorsement, thus fulfilling my role as an outside Member of the Board.

I believe that the technological and R&D capabilities of the NTT Group are not only at an exceptionally high level in Japan, but also globally. I am convinced that, if harnessed effectively, these strengths will offer competitive advantages to the NTT Group, and to the wider public and society as a whole. Leveraging my insights as a researcher in industrial policy and science and technology policy, I intend to offer my feedback and advice while also properly overseeing the execution of business operations, thereby contributing to the sustainable growth of the NTT Group.

I assume that the National Research Institute for Metals (NIMS) has a role as a medium-term strategy to promote the development of advanced materials. This is because the NIMS has been conducting research and development since 2019 with the goal of creating materials that are highly suitable for various applications, such as energy storage, electronics, and transportation. The research conducted at NIMS has been highlighted by the establishment of the NIMS’ Research and Development Center, which focuses on the development of new materials for future applications.

In conclusion, I believe that the NIMS has a vital role in promoting the development of advanced materials to achieve sustainable growth. I will continue to support the NIMS and contribute to its development to ensure that it remains at the forefront of research and development in this field. I also believe that it is important to promote the use of renewable energy sources to reduce carbon emissions and protect the environment. I support the efforts of the NTT Group to achieve carbon neutrality by 2040 and believe that the NTT Group can play a significant role in promoting the use of renewable energy sources. I will continue to support the NTT Group in its efforts to achieve sustainability and promote the use of renewable energy sources.
Nomination Committee and Compensation Committee Composition and Activities

With the objective of further strengthening independence, objectivity, and accountability in decisions made by the Board of Directors with respect to appointments and compensation of the Members of the Board and officers, the Company has voluntarily established a Nomination Committee and a Compensation Committee, each consisting of five Directors, of which a majority (three) are Outside Independent Members of the Board, as preliminary review institutions of the Board of Directors, thereby increasing the effectiveness of governance. As of the end of fiscal 2022, the membership of each committee consisted of Akira Shimada (Representative Member of the Board, Senior Executive Vice President), Kōzō Watanabe (Outside Member of the Board), Yūkako Uchinaga (Outside Member of the Board) and Koichiro Iwashita (Outside Member of the Board), with Akira Shimada (Representative Member of the Board, President) serving as chairperson to oversee the proceedings of each committee. As of the submission date of this report, there have been no changes in the members or chairpersons of both committees who oversee meeting operations and agenda setting. In each committee, resolutions are made with the approval of the majority of the attendance of more than half of the committee members. During fiscal 2022, the Nomination Committee convened five times, and the Compensation Committee once, engage in robust discussions on matters such as the appointment of officers, succession planning, and the nature of the executive compensation system (all committee members were present at all meetings).

Board Member Compensation

Board Member Compensation Determination Policy and Process

Regarding the composition and level of compensation for directors of NTT under the Determination Policy, in order to secure objectivity and transparency, NTT established the Compensation Committee, comprising five directors, including three outside independent members of the Board. Moreover, decisions on the ratios and calculation methods for compensation for Members of the Board, and amounts of compensation for individual Members, are delegated from the Board of Directors to the Compensation Committee. The reason for delegating these authorities to the Compensation Committee is that such committee is composed of two Representative Members of the Board and three Outside Members of the Board, and we believe that it is able to make the appropriate judgements from an outside perspective while also taking a bird’s-eye view of the Company’s overall performance.

Compensation of individual directors (excluding outside Members of the Board) consists of a monthly salary (base salary) and a bonus (compensation related to performance over the short term), NTT stock purchase through Board Members Shareholding Association and performance-linked stock compensation (compensation related to performance over the medium to long term). The composition ratio of compensation in a case where standard business results are achieved is roughly as follows: Fixed compensation: Short-term performance-linked compensation = 50%: 30%.

- Monthly salary (base compensation): The base salary is a fixed compensation paid monthly on the basis of the scope of each Member of the Board’s roles and responsibilities.
- Bonus (short-term performance-linked compensation): The bonus is paid in June each year, taking into account NTT’s business results for the current fiscal year. The amount of this bonus is based on the achievement of indicators based on targets in the Medium-Term Management Strategy.
- Stock buybacks and performance-linked stock compensation (medium- to long-term performance-linked compensation): NTT shares shall be purchased through the Board Members Shareholding Association by means of monthly stock acquisition compensation. Purchased shares are to be held by the Members of the Board throughout their terms of office. For the performance-linked stock compensation, a trust, established by NTT is used. The Members of the Board are granted points corresponding to their role in June each year and a performance-linked coefficient corresponding to the level of achievement of the performance indicator is determined in June of the year following the final fiscal year of the Medium-Term Management Strategy, and the number of shares to be granted to each Member of the Board is calculated by multiplying the performance-linked coefficient by the number of points that has been accumulated. The granted shares are delivered to the Member of the Board upon retirement. Regarding performance-linked stock compensation, given that the target year for the medium-term management strategy announced in November 2018 is fiscal 2023, Earnings Per Share (EPS) will continue to serve as the performance indicator.

In order to maintain a high level of independence, compensation of outside Members of the Board consists of a monthly fixed compensation only, and is not linked to NTT’s business results. Compensation of Audit & Supervisory Board Members is determined by resolution of the Audit & Supervisory Board and consists of a monthly salary only, for the same reasons as those cited above with respect to outside Members of the Board.

Nomination-related matters regarding directors, executive officers and others, for which the committee receives requests for deliberation from the Board of Directors.

### Notes
1. The Earnings Per Share (EPS) figures are presented based on amounts before taking into account the impact of the 25-for-1 stock split of common stock, effective as of July 1, 2023.
2. The scope of aggregation for the overseas operating profit margin is subsidiaries of NTT, Inc. at the time the medium-term management strategy was established (NTT DATA Corporation’s overseas operations, NTT Ltd., NTT Communications’ overseas operations, etc.). In addition, operating profit is calculated while excluding temporary expenses, such as M&A-related depreciation costs of intangible assets.
3. The target for GHG emissions is GHG protocol Scope 1 + 2.
5. The scope for the percentage of women newly promoted to management positions includes six major domestic companies: NTT, NTT DOCOMO, NTT Communications, NTT East, NTT West, and NTT DATA Japan.

Additionally, starting from fiscal 2023, for the performance indicators associated with bonuses, we plan to introduce EBITDA as part of the financial indicators. This shift aligns with our new medium-term management strategy, which places greater emphasis on growth and cash generation capabilities than before. As for sustainability indicators, we incorporated Engagement Rate, aimed at fostering an environment where employees, the source of revenue generation, can elevate their expertise and experience both growth and job satisfaction.

Stakeholder Engagement

NTT Group delivers products and services to a diverse set of stakeholders worldwide, and its value chain is expanding on a global scale and becoming increasingly complex each year. Given these developments, there is also a diversification in what our stakeholders expect and require from our business. It is crucial to accurately grasp and incorporate these demands and expectations into our operations through stakeholder engagement.
