^{*} Represents profit attributable to NTT East.

Initiatives to Restore Earning Ability

- Migrating Legacy Services to Alternative Services, and Improving Customer Engagement through CX×DX
- Developing Optical Demand to Capture High-Speed Needs

3 Turning Regional Customers in Loyal Customers

4 Strengthening Networks to Support Increasing Traffic

1-1 Migrating Legacy Services to Alternative Services

Maximizing the approx. ¥200.0 billion Legacy Service Revenues Base

Legacy Services

- Telephone Subscriptions
- INS-Net
- FLET'S・ADSL
- FLET'S·ISDN
- STM (Dedicated Lines)
- Telephone Books

Maximize Migration

Alternative Services

- Hikari Services, Hikari Denwa
- Optical Line Phones
- Wireless Landline Phones
- Wireless Services
- I-WAN and VPN Services
- Digital Lead

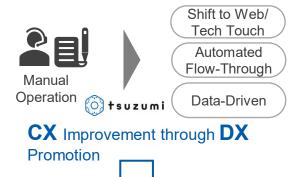

Minimize Metal Cable Costs

- ✓ Avoiding the need to install new metal cables by using wireless landline phones and optical line phones
- ✓ Using construction opportunities, such as obstacle removals, to transition to wireless landline phones and optical line phones
- Bulk migration of telephone exchange offices (trial)

1-2 Improving Customer Engagement through CX×DX

Creating a simple business flow that aims to both improve customer engagement and optimize business efficiency

- Leveraging generative AI and other cutting-edge technologies
- Redeveloping operations systems

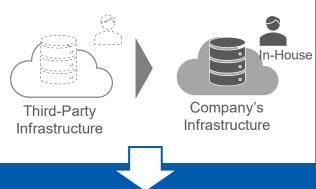

Cumulative from FY2024~FY2027

approx. 3,000 Positions Created

Develop business flow experts, and promote self-sufficiency and in-house development of business systems

- Migrating outsourced business systems to in-house infrastructure (cloud)
- Expanding the scope of in-house system development and operation

Cumulative from FY2024~FY2027

approx. ¥30.0 billion in Reductions

Accelerate the early-stage transition of paper- and people-based services into digital services

- Updating phone books into digital services((Digital Lead, iTownPage)
- Reducing environmental impact by eliminating paper forms

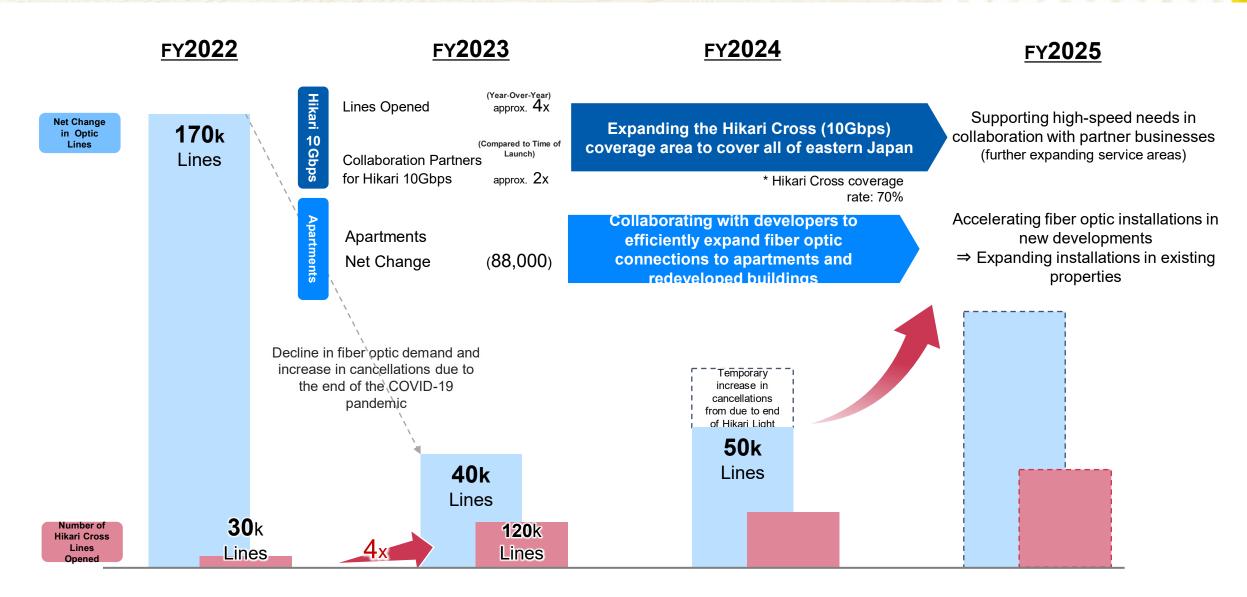

Cumulative from FY2024~FY2027

approx. ¥10.0 billion in Reductions

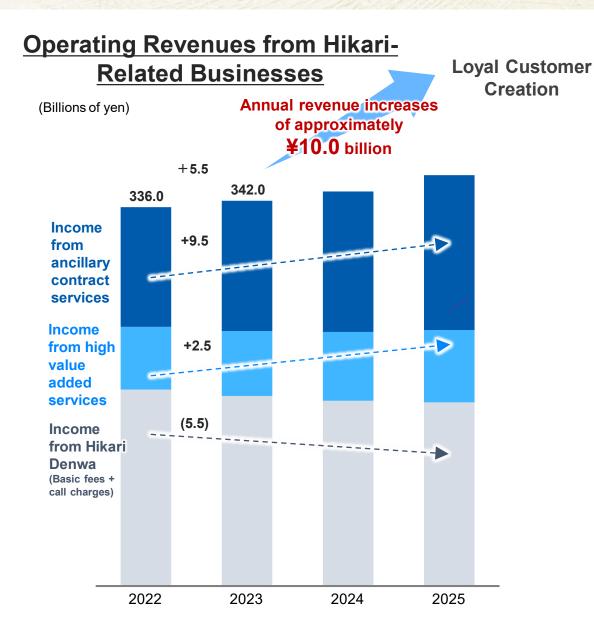

2 Developing Optical Demand to Capture High-Speed Needs

3 Turning Regional Customers into Loyal Customers

Supporting the Digitalization of Local Governments and Public Institutions

One-stop provider of regional problem-solving and value creation, AI and digitalization needs from wideranging perspectives

Local Development / Renewable Energy / Smart Agriculture

Total Support for Small and Medium-Sized Enterprises

 Proactive and total support for office ICT environments through multi-channel collaboration

4-1 Updating Existing Assets (to Profitable Assets for the Al Era)

5,000 Digital Human Resources World-Leading
Information Superhighway

IOWN×**REIWA**

400 Urban
Development
Consultants

11,000 Communications Engineers

Evieting Assots

3,000 Regional Consultants

Region-Supporting Engineering Groups

Existing Assets

Community-Based
Urban Development
Experts

Sharing

Updating to Next-Generation

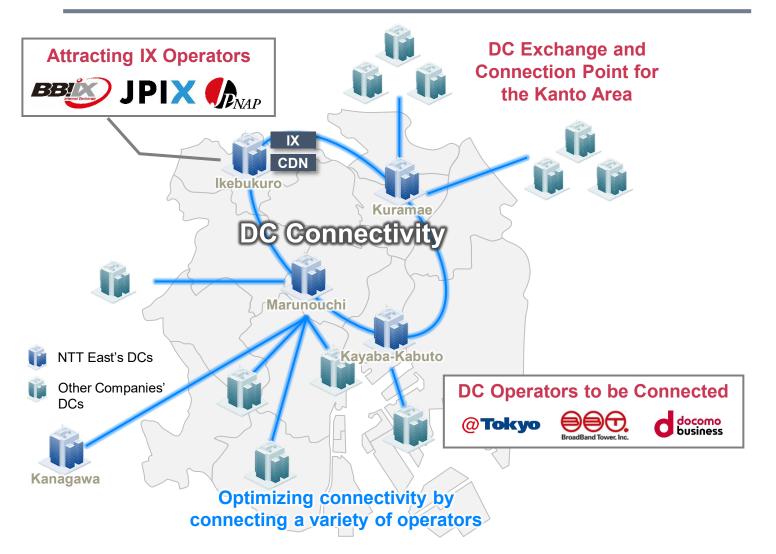

Digital Infrastructure

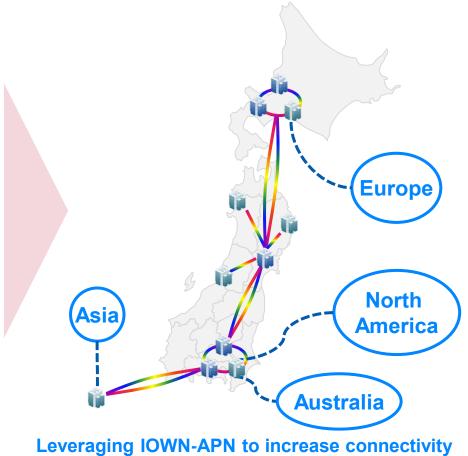

Leveraging Assets to
Create New Businesses and
Diverse Services

4-2 Strengthening Networks To Support Increased Traffic

Network Infrastructure to Handle Increased Traffic

Future (Making Japan Asia's Data Hub)

Leveraging IOWN-APN to increase connectivity with landing stations and local operators
