3. Operating Data (ARPU)

Average Monthly Revenue per Unit (ARPU)

Average monthly revenue per unit, or ARPU, is used to measure average monthly operating revenues attributable to each designated service on a per user basis. In the case of NTT Group's integrated ICT business, ARPU is calculated by dividing revenue items included in operating revenues from 16 month, by the number of active users to the relevant services. In the case of NTT Group's regional communications business, ARPU is calculated by dividing revenue from 56 mobile phone services, and "docomo Hikari" services, that are incurred consistently each month, by the number of active users to the relevant services. In the case of NTT Group's regional communications business, ARPU is calculated by dividing revenue at the relevant services. - (1) Beginning with the fiscal year ended March 31, 2022, Mobile ARPU is calculated to include OCN mobile-related revenues and subscription numbers.
- (2) The following is the formula we use to compute ARPU for NTT DOCOMO.

Aggregate ARPU = Mobile ARPU + "Hikari" ARPU

- Mobile ARPU: Mobile ARPU-related revenues(basic monthly charges, voice communication charges, packet communication charges) / No. of active users
- "Hikari" ARPU: "docomo Hikari" -related revenues (basic monthly charges, voice communication charges) / No. of active users
- (3) Numbers of active users used in the ARPU calculation of NTT DOCOMO are as described below.
- Sum of No. of active users for each month {(No. of users at the end of previous month + No. of users at the end of current month) / 2} during the relevant period
- (4) The number of "users" used to calculate ARPU is the total number of subscriptions, excluding the subscriptions listed below:
 - Subscriptions of communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver" and wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs, and Data Plan subscriptions in the case where the customer contracting for such subscription in his/her name also has a subscription for "5G," "Xi" or "FOMA" services in his/her name.

Note that revenues from communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver" and wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs and the impact on revenues from "dPOINT" program, etc. are not included in ARPU calculations.

- (5) We compute the following two categories of ARPU for business conducted by each of NTT East and NTT West.
 - Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines); Calculated based on revenues from monthly charges and call charges for Telephone Subscriber Lines and INS-NET Subscriber Lines, which are included in operating revenues from Voice Transmission Services (excluding IP Services), and revenues from "FLET'S ADSL" and "FLET'S ISDN," which are included in operating revenues from IP Services.
 - FLET'S Hikari ARPU: Calculated based on revenues from "FLET'S Hikari" (including "FLET'S Hikari" optional services), which are included in operating revenues from IP Services, revenues from monthly charges, call charges and connection device charges for "Hikari" optional services, which are included in Supplementary Business revenues.
 - "FLET'S Hikari" includes "FLET'S Hikari Cross," "FLET'S Hikari Next," "FLET'S Hikari Light," "FLET'S Hikari Mytown Next," "FLET'S Hikari Denwa Next (Hikari IP Denwa)" provided by NTT East, and "FLET'S Hikari Cross," "FLET'S Hikari Next," "FLET'S Hikari Mytown Next," "FLET'S Hikari Light" and "FLET'S Hikari Denwa Next (IP Denwa Next (IP Denwa Next (IP Denwa Next)," provided by NTT West. In addition, "FLET'S Hikari Collaboration Model," the wholesale provision of services to service providers by NTT East and NTT West.
 - "FLET'S Hikari" Optional Services includes wholesale services provided to service providers by NTT East and NTT West.
- (6) Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines) and FLET'S Hikari ARPU do not include interconnection charges.
- (7) Numbers of active subscribers used in the ARPU calculation of NTT East and NTT West are as below.
 - Results: Sum of number of active subscribers {(number of subscribers at end of previous month + number of subscribers at end of the current month)/2} for each month in the relevant period
 - FY Forecast: Sum of the average expected active number of subscribers during the fiscal year ((number of subscribers at March 31, 2022 + number of expected subscribers at March 31, 2023)/2)x12
- (8) For purposes of calculating Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines), the number of subscribers is determined based on the number of subscriptions for fixed-line services (Telephone Subscriber Lines + INS-NET Subscriber Lines).
- 9) In terms of number of channels, transmission rate, and line use rate (base rate), INS-Net 1500 is in all cases roughly ten times greater than INS-Net 64. For this reason, for the purpose of calculating Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines), one INS-Net 1500 subscription is calculated as ten INS-Net 64 subscriptions.
- (10) For purposes of calculating FLET'S Hikari ARPU, the number of subscribers is determined based on the number of FLET'S Hikari subscribers, which includes subscribers to "FLETS Hikari Next," "FLET'S Hikari Light," "FLET'S Hikari Lightplus" and "FLET'S Hikari WiFi Access" provided by NTT East, subscribers to "FLET'S Hikari Cross," "FLET'S Hikari Cross," "FLET'S Hikari Mytown Next," and "FLET'S Hikari Light" provided by NTT West, and the "Hikari Collaboration Model," the wholesale provision of services to service providers by NTT East and NTT West.
