

It's important to have dreams.

Haven't we all worked hard to make our dreams come true?

But dreams don't come true easily.

Watching professionals who bravely pursue their dreams inspires children to have the courage and confidence to have their own dream. They see the continuous challenges and efforts in them. By witnessing them stand tall after overcoming numerous sacrifices, children learn valuable lessons to achieve their dreams.

DOCOMO has a history of connecting various things around us.

And now, DOCOMO has created ' DOCOMO Mirai Field' with the hope that children will have the courage to pursue their dreams by experiencing the world of professionals and bridging their dreams with their future.

"All our dreams can come true, if we have the courage to pursue them."

It was fun, I started to like soccer more.

My dream is to become as strong as Naoya Inoue.

Field 01 Rugby

In rugby, you witness fierce clashes that resonate with sound, and you see players running tirelessly, never giving up until the very end.

Of course, to become a rugby player!

Field 02 Motorsport

In 'Super Formula,' which competes at a top speed of 300 km/h and in tenths of a second, courage to overcome fear is also necessary. You experience the harsh reality of racing, with the roar and the smell of burnt oil, you never know what will happen, with crashes and machine troubles.

Find something you really love! It will support your life in the future.

To become a racer and win at Fuji Speedway!

Field 03 Orchestra

The NHK Symphony Orchestra is a dream for aspiring musicians, but some give up, thinking it is unattainable. However, from the words of a member who began in junior high school, I learned that you could stand on that stage through your effort.

It was impressive to experience brass instruments, which I rarely have a chance to touch.

Field04 Figure Skating

Figure skating, which glides beautifully and lightly, is very glamorous, but when you actually experience it, you realize how difficult it is.

Just standing was all I could do, and I realized how amazing professionals are.

I was surprised by the sound of the ice being shaved and the speed, and I was breathless at the glamorous performance. I learned the hard work they put into practice on the rink every day, without rest, since childhood.

There were many times I wanted to quit but I thought if I gave up, I would feel very uneasy about the things I value. So, no matter how hard it was I decided to do my best!

Field05 Boxing

To win, you must believe in the training you have gone through and conquer your fears.

How much effort does it take to achieve the sharp movements, keen eyes, and the sound and speed of an athlete's punches?

Every day, consistently, I have been training every day since I was about your age.

I want to become a boxing athlete.

I want to be active as Inoue.

Through DOCOMO Mirai Field, we have provided various opportunities for 330 children to experience the world of professionals.

In the future, we plan to expand our events nationwide and further broaden the experience programs.

We have also received voices from various companies wanting to join this program.

We hope to provide experiences that will bridge children's dreams and their future, by gathering various companies and organizations, to expand the dreams and possibilities for children.

We hope that DOCOMO Mirai Field will give children passion and courage to keep striving towards their dreams.

Experience the world of professionals.
DOCOMO Mirai Field
